## Policy Vendor ComAbility Closes Down

After having 36 PCRF vendors on my [matrix](#) (and there probably more out there), we now see the number of vendors shrinking. **Telcordia** ([here](#)) and **Bridgewater Systems** ([here](#)) were acquired by vendors that already had a policy offering, and now one of the smaller players is closing down.

Batya Feldman reported to **Globes** yesterday that "Ten days ago, Israeli start-up **ComAbility** closed down, and its 25 employees were laid off. On Thursday, the Tel Aviv District Court appointed Yoav Kfir of VAR Management as temporary receiver"

See "[Subscriber management co Comability closes down](#)" - [here](#).

ComAbility (covered [here](#)) focused was on [subscriber management systems](#) for Carrier Wi-Fi services. Its customer base includes **Swisscom**, **Turk Telecom** and **Turkcell**.

The Hebrew version ([here](#)) quotes the receiver, **Yoav Kfir** (pictured), saying that - "*ComAbility has assets, technology and paying customers; we believe we can either revive it, sell the company or its assets*".

Anyone interested - you know whom to [call](#).
